REFRESHMENTS

Ralph & Linda Baker

Dear Model A'ers:

I hope everyone survived the ice storm. It was a hassle to get around for a few days. I heard a few reports of members with "CABIN FEVER."

The Okie A's have invited us to share chili and beans on Saturday February 14. We have also been asked to bring a dessert to share. Let's remember to chip in and help with the cost of the hall rental.

In our prayers let's remember Beth Dixon, Linda Shaw and any other members who are ill.

Wishing you a Happy Valentines Day

DeWayne Owens

President

Next Meeting

Tuesday, February 17

7:00 PM

PROGRAM: Horn Rods

JOIN THE FUN

VALENTINE'S DAY

DINNER/PARTY

The Okie A's have again invited our Club to participate in their Valentine's Day Dinner/ Party. It will be held on Saturday, February 14, 11:30 AM. It will be at the IOOF Lodge Hall, 13131 E Britton Road in Jones, OK.

This party is always a lot of fun. They have graciously invited us for the past several years. There is always great Chili and desserts and they have asked us to bring a dessert. They always play some kind of really fun game and it is a great time to get to know these fine folks who also enjoy this great hobby.

Bring your Model A and park out front to show it off. See you there!!!

ANNUAL LADIES' COOKIE/CANDY EXCHANGE

The Annual Ladies' Cookie/Candy Exchange was held on December 17 at Katy & DeWayne Owen's home. I did not have room to put this in the January newsletter so I am reporting it now.

We had a good turnout. We were served a wonderful soup made by Katie and lots and lots of good salads brought by the ladies' along with the cookies and candies for exchange and sampling. I am sure even though this event was for the ladies that all of the husbands enjoyed the great treats that were brought home and didn't feel left out. It was a great time for holiday fun and visiting with friends.

TECH TIP FROM BOB HESS, HEART OF AMERICA MODEL A FORD CLUB, KANSAS CITY

The correct carburetor float level is very important, particularly on Zenith carburetors. If the gas level is not at the correct level, the engine can stall during stopping and accelerating. Many articles have been written on the best way to measure the correct float level. Sometimes, no matter how many times you try to get it right, it just doesn't work. One possibility could be the float itself. If someone had used a replacement float, there may be a concern as to what the buoyancy might be; the manufacturers of aftermarket floats are not concerned about weight.

However, if you still have an original type float, they are all the same weight. All you have to do to set the float level is to adjust it using various fuel valve washers, so that the float is parallel to the carburetor body when the valve is closed. If you find that you are using a replacement float, all you can do is experiment while driving the car in order to get the proper operation.

(January, 2009 issue of News 'A' Letter, Heart of America Model A Ford Club)
